## Participant profile

This course is aimed at learners interested in climate change issues and their impacts on business and finance from the perspectives of businesses, corporate issuers, a wide range of financial services providers, like accountants, and investors. The course will also be of special interest individuals in related supporting fields, such as banking, investment banking, legal, valuation, and general consulting.

This course provides an introduction to climate change and its related economic and environmental impacts as well as climate solutions. You will be introduced to key elements around climate change, carbon pricing, sustainable business models, and climate risk and opportunities in the context of business as well as portfolio construction and investment analysis. It is a practical and applied digital course in the space of climate to support business, finance, investment and accounting professionals. It is also useful for individuals seeking practical guidance around climate change and climate-related finance matters.

## Learning outcomes
