

Response Form
for the
Exposure Draft of the
CFA Institute ESG Disclosure Standards for Investment Products

CFA Institute is developing voluntary, global industry standards, the CFA Institute ESG Disclosure Standards for Investment Products (the “Standards”), to establish disclosure requirements for investment products with ESG-related features. The purpose of the Standards is to provide greater transparency and consistency in ESG-related disclosures, resulting in clearer communication regarding the ESG-related features of investment products. The goal for this Exposure Draft is to elicit feedback on the proposed principles, requirements, and recommendations within the Standards. Please refer to the “Providing Feedback” guidelines for submitting comments. **All comments must be received by 14 July 2021 in order to be considered.**

Providing Feedback

Public commentary on the Exposure Draft will help shape the final version of the Standards, which is expected to be issued in November 2021. Comments should be provided in this Response Form, found [here](#) on the CFA Institute website, and submitted to standards@cfainstitute.org. Designated spaces for comments appear in the Response Form in the order in which the related topic sections appear in the Exposure Draft. Questions directed toward the Standards’ intended users are posed in the Exposure Draft’s Introduction, and these questions appear first in the Response Form, followed by designated spaces for comments related to the Guiding Principles, Provisions, and Glossary. General or summary comments on the Exposure Draft may be provided in the designated section at the end of the Response Form.

Each topic section in the Response Form contains a space for providing general comments pertaining to that section as well as spaces to provide comments for each provision in the section. When providing feedback on a specific provision, it may be helpful to consider whether the meaning of the provision is clearly stated and whether the provision will add value for users of the Standards. You may provide as few or as many comments as you wish.

The deadline for providing feedback is 14 July 2021. **Comments received after 14 July 2021 will not be considered.** Unless otherwise requested, all comments will be posted on the CFA Institute website.

Guidelines for submission

Comments are most useful when they:

- directly address a specific issue or question,
- provide a rationale and support for the opinions expressed, and
- suggest alternative solutions in the event of disagreement.

Positive comments in support of a proposal are equally as helpful as those that provide constructive suggestions for improvement.

Requirements for submission

In order for comments to be considered, please adhere to the following requirements:

- **Insert responses in the designated areas of the response form.**
- **Assign a unique file name to your response form before submitting.**
- **Provide all comments in English.**
- **Submit the response form as a Microsoft Word document.**
- **Submit the response form to standards@cfainstitute.org by 5:00 PM E.T. on 14 July 2021.**

<QUESTION_03_05>

N/A

<QUESTION_03_05>

Questions for Database Providers and Users

1. To what extent would a compliant presentation provide the ESG-related information that users are looking for?

<QUESTION_04_01>

- We believe that a compliant presentation would enhance the quality of ESG-related disclosures on investment product strategies for a number of reasons, including:
 - Information on investment products that follows the general principles of the Exposure Draft such that it is complete, reliable, truthful, consistent, clear and concise and accessible.
- We welcome the fundamental requirements and disclosure requirements set out in the Exposure Draft, which address presentation and topics of ESG-aligned products and set out clear information on product intention. In this way, we believe the compliant presentation would support greater transparency and usefulness.
- As currently envisaged, many elements covered by the compliant presentation are also required by the European Union's Sustainable Financial Disclosure Regulation (SFDR), thereby securing common approaches to the communication of ESG-aligned activities. This will reduce the risk of actual or perceived greenwashing and also greatly ease the administrative burden on preparers of such disclosure.

<QUESTION_04_01>

2. Is it necessary, or would it be helpful, for compliant presentations to be in a standardized format? Would it be helpful if a machine-readable template was developed?

<QUESTION_04_02>

- We would support a standardised format for compliant presentations in order to improve their transparency and usefulness, particularly given that all disclosures required by the standards must be contained within a single document.
- A machine-readable template would improve access, comparability and usability of information and be in line with wider market developments, such as the introduction for issuers of the European Single Electronic Format, and broader adoption of electronic tagging and analysis of disclosures.
