If you find something in the curriculum that you think is in error, please submit full details via the form at http://cfa.is/Errata.

- Corrections below are in bold, and new corrections will be shown in red; page numbers shown are for the print volumes.
- The short scale method of numeration is used in CFA Institute curricula. A billion is $10^9$ and a trillion is $10^{12}$. This is in contrast to the long scale method where a billion is $1 \text{ million squared}$ and a trillion is $1 \text{ million cubed}$. The short scale method of numeration is the prevalent method internationally and in the finance industry.

Level 1, Volume 2
An Introduction to the Global Investment Performance Standards (GIPS®) (Reading 12)

- In Practice Problem 13, answer option A (page 312 of print) should be 4.57% and answer option C should be 4.53%.
